

The alternative to hip and knee replacement...

...is the alternative to concrete or hard flooring:

Pennswood Village, Newton, PA

VERLAYO®

Hammer Café, Los Angeles, CA

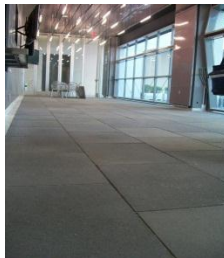

VERLAYO® recycled rubber overlay immediately transforms concrete, asphalt or hard flooring into a safe and comfortable walking surface.

Nothing breaks on VERLAYO® (not glass, not bones)....

- Walking is a recognized benefit to physical and mental health—yet walking can be uncomfortable or even dangerous on the wrong surface—like concrete sidewalks, especially broken and uplifted concrete.
- It's reported that hip and knee replacements are increasing. No one wants to spend their retirement as an out-patient, or hindered by hip and joint pain and injury.

Walter Ward Park, Bronx, NY

Hammer Cafe, Los Angeles, CA

Riverfront Park, Montgomery, AL

Choose from several colors in our heavy duty and durable overlay tiles, allowing pavement to be laid in patterns or solid color while providing the ultimate in safe walking, both interior and exterior.

Replace your sidewalks, not your joints.
